

VEGIBEE™

GARDEN POLLINATOR

The new VegiBee™ Garden Pollinator is a sonic handheld rechargeable electric device that is designed to harvest the excess pollen in vegetable plants. The pollen can then be used to pollinate 4-5 additional flowers on the same plant. Try it on tomatoes, peppers, beans, peas and eggplant.

PLUG PUSHER

This easy to use, economical tool can be used by right or left handed personnel. The Gro-Mor Plug Pusher is recommended for use with well rooted plugs. Simply hold, then plug tray firmly with one hand, line up the extenders with the drain holes of the plug tray and push. The plugs drop undamaged from the plug tray.

Catalog #	Description
33-511000	Plug Pusher - 128, 200, 288
F.O.B. FACTORY	

When ordering, please specify flat size, flat mfg., number and configuration of cells. A sample tray may be needed.

*Add \$4.00 for 392, 406, 512 **PLEASE NOTE:** Plug Pushers are a special order item shipped direct from the factory. Please allow ample time for delivery.

WAND SEEDER

Product
Model TM-1
Venturi Pump Package TM-3

Model TM-1
Includes standard wand of your choice, (for instance 512 plug tray, 406pt, 288pt etc.) hose

with needle valve, seed bin, complete set of 90 GRO*MOR tips. heavy duty 115 volt vacuum pump. (220 volt pump for foreign applications available)

Venturi Pump Package TM-3
Includes seed bin, standard wand of your choice, (for instance 512 plug

tray, 406pt, 288pt etc.) hose with needle control valve, complete set of 90 GRO*MOR tips. And a venturi pump that attaches to a regulated compressed air line of compressor.

COMPLETE GERMINATING KIT

The Heated Germination Station offers increased growing success by providing gentle warmth to the planting bed and by controlling humidity under the dome.

The complete unit includes:

- UL Listed Waterproof Mat (17 watts, 120 volt)
- 2.5" Humidity Dome
- 11" x 22" Watertight Base Tray
- 72-cell Seedling Insert
- Instructions with Growing Tips

Catalog #	Description
33-019910	Germination Station - Complete Unit

VIBRO HAND SEEDER

This seeder has a speed control function which separates the seed as it drops off the end, allowing for faster seeding, even distribution, and less waste. Lightweight & portable. 9 volt battery incl. Place seeds into spatula. Evenly distribute. Hold seeder level over flat or tray to be filled. Depress switch, hold firmly. Turn speed control, adjusting until seed is moving slowly off the tip of the spatula. The speed can be also changed by tilting the seeder.

Catalog #	Item #	Description

33-630220	PSA-2	Power Supply Adapter
33-630230	MAG-3	Magnifier Attachment

GERMINATING BAGS

These clear polyethylene bags are designed for encasing standard or true flats to prevent drying out during germinating. Especially useful in germination chambers. Germination bags fit standard flats and measure 12" wide x 30" long.

Catalog #	Description
64-363100	Germination Bags (100/bg)

SEEDLING HEAT MATS

Designed to fit under common seed flats, this mat warms the rooting area 10-20° above ambient room temperature, promoting faster growth. This mat is UL listed/plug-in ready and has a waterproof construction. Helpful instructions for lighting, planting and watering are printed right on the mat!

AS EASY AS 1-2-3!

1. Place mat on drained surface (no standing water).
2. For warmer mat temp, place mat on insulated surface rather than cold floor. Covering tray with propagation dome will also increase temp.
3. Plug mat into a 120 volt power source.

Catalog #	Description
33-010920	9" x 19.5" (25 watts) (1 seed flat)
33-011820	20" x 20" (45 watts) (2 seed flats)
33-012048	20" x 48.75" (107 watts) (4 seed flats)

PROPAGATION DOMES

Propagation Domes are a quick and easy way to increase the temperature and humidity surrounding seedlings. Designed to fit on standard flats. Made of sturdy vinyl. Measure: 11" x 22".

Catalog #	Description
59-022100	Propagation Dome (5/pack)
59-022100	Propagation Dome (50/case)

AGRITAPE®

PRECISE HEAT MATS

The Precise Heat Mat is self-contained and can easily be rolled up for storage. Designed for the small commercial grower and the home gardener. The heater consists of the Agritape heating element (11" wide by either 4' or 8' long) and a built-in adjustable dial thermostat.

Provides 20 watts per foot in an extremely uniform precise temperature over the entire surface. Can be set to any desired soil temperature. Plugs into a standard wall outlet. Seed trays can be placed directly on the tape.

Catalog #	Description
33-301104	Heat Mat 11" x 4' w/ built in thermostat
33-301108	Heat Mat 11" x 8' w/ built in thermostat

ROOT ZONE HEATERS

For faster germination and propagation. Set up is quick and easy. Just roll out the Agritape, cover with grounding screen and plug into your thermostat. If you need a larger size, you can customize your system up to 25' long. Order Agritape and grounding screen separately.

Catalog #	Description
33-321112	Heat Mat Kit 11" x 10' - includes agritape, grounding screen and instructions

HEAVY DUTY PROPAGATION MAT REMI-HEAT

Redi-Heat Propagation Mats are portable and can be used anywhere root zone heat is necessary. They provide even, constant heat to root zone for flats and pots. Designed for use on greenhouse benches or any flat surface. Water-

proof and fully grounded against electrical shock. As with all electrical products, use care when working with and around the mats. Redi-Heat Mats are provided with a heavy duty 8' cord and a molded NEMA three prong plug for 120 volt AC current. The mats are easy to install and economical to operate. Excellent for plant propagation or growing. When using mats with GFI outlets, stay below 500 watts to avoid tripping GFI.

RHT-4 THERMOSTAT

For automatic control of heating mats. Four heating elements may be plugged into thermostat. Each heating device will be heated to setting the grower dials on thermostat. Temp

range, 40°F to 100°F with accuracy of +/-3°F.
