

E-ZY GROWER STRUCTURES GOTHIC ARCH STYLE

Our E-zy Grower Gothic Arch greenhouse frames are designed to shed heavy wet snows better than any other design. Manufactured from Allied Gatorshield® steel tubing, our frames are built tough to withstand harsh winter weather. Available in three widths; 21', 24', and 30'. All three widths use a standard size of poly covering, which eliminates the annoying task of special ordering poly! Our basic frame package includes bows, ground posts, purlin, kneebraces, hardware, clamps, & instructions. And, as always, custom lengths are not a problem. Simply call our Sales Team for your specialized quote today.

Other items you may need to consider for your new greenhouse structure:

- Polyethylene or Polycarbonate covering
- Inflation Blower
- Horizontal Air Flow (HAF) Fans
- Exhaust Fans and Shutter
- Heaters
- Thermostats
- Ground Covering
- Benches

GREENHOUSE PACKAGE ADDITIONS (OPTIONAL):

Call us for a Quick Quote on greenhouse frames or optional packages.

We have many packages for you to choose from. Mix & match or let our sales team help you decide. Don't spend your valuable time trying to figure out which parts you need....

Simply choose a structure size and pick the packages!

CROSSBRACE PACKAGE:

Crossbraces are designed to add extra support to the structure. Steel crossbars are attached with clamps to short truss pieces and hung near the peak of structure at least every other bow. We highly recommend this option especially on any structure that is exposed to adverse weather conditions.

POLY ROLLUP SIDE VENTS:

A natural, eco-friendly means of ventilating the greenhouse. Poly is secured onto round steel tubing which rolls up and down guide posts by a gear box at one end and guiding box at the opposite end. We offer specific options within this package to meet your individual operating needs.

SLIDING DOOR PACKAGE:

Sold complete or a la carte. Frame is all steel construction which supports aluminum extrusions that secure 8mm polycarbonate. Doors hang from sturdy track, trolley and hardware supplied.

ENDWALL PACKAGE:

This package can be tailored to your needs. Order the endwall frame only, complete with all the steel and hardware for the gable end. Or you may add poly or rigid 8mm polycarbonate for a permanent clear gable end.

POLY LOCK PACKAGE:

Package includes enough aluminum Poly Spring Lock and Wire Insert to secure poly to base boards at both sides of structure and enough Universal Spring Lock and Wire Inserts to secure poly at both end bows.
