

Authorized Distributor

M-Pede Insecticide-Miticide-Fungicide

Natural, safe, insecticide, miticide, and fungicide that provides excellent contact control of various soft bodied insects, mites, and powdery mildew throughout their life cycles. NOP compliant and OMRI certified.

Insecticidal soap and bio-fungicide providing broad-spectrum protection against soft bodied insects, mites, and powdery mildew

12-hour REI / 0-day PHI

Scythe Herbicide

When Scythe makes contact with a living plant; the spray quickly penetrates GREEN plant tissue and disrupts normal membrane permeability and cellular physiology. The disruption of the cell membrane results in cell leakage and death of all contacted tissues.

Aza-Direct
BOTANICAL INSECTICIDE

Aza-Direct Biological Insecticide

A broad-spectrum biological insecticide that controls key insect pests on greenhouse and outdoor food crops. NOP compliant and OMRI certified.

Broad-spectrum biological insecticide for both organic and conventional agriculture systems

Superior formulation making Aza-Direct one of the most stable and effective azadirachtin insecticides in the market

Soft on beneficial insects and pollinator

4-hour REI / 0-day PHI

Captiva
INSECTICIDE / MITICIDE

Captiva Insecticide

Captiva™ is a bio-insecticide formulated using concentrated plant extracts which are active against Thrips and Spider Mites. Captiva has multiple modes of action (MOA) including insecticidal, repellency, anti-feeding and anti-egg laying properties.

Captiva™ is a very effective tool for Integrated Pest Management (IPM) that helps to manage insect pest populations and can be used alone or in tank mixes with other biological/conventional insecticides or miticides to improve the level of control.

Authorized Distributor

MESUROL 75-W Sanmite Miticide/Insecticide

Mesurol is an effective insecticide-molluscicide for the control of slugs, snails, Western Flower Thrips, and other insects. Mesurol 75-W is a time tested insecticide/molluscicide for nursery and greenhouse ornamentals. Mesurol acts on contact providing effective control of western flower thrips and broad spectrum control of terrestrial slugs and snails. Activity is not affected by low temperatures or high moisture environments. Mesurol offers effective reliable long residual control.

SANMITE Miticide Sanmite Miticide/Insecticide

Sanmite works primarily through contact action and should be applied when pest populations are building before plant damage occurs. Sanmite is proven safe on a large number ornamental plant species. Sanmite is intended for control of mites and whitefly on ornamental plants, flowers and foliage crops grown in greenhouses and outdoors. Sanmite provides quick knockdown and good residual control of a broad range of mite and whitefly pests.

HEXYGON Miticide Hexygon DF Ovicide/Miticide

Hexygon is a proven long lasting miticide, providing consistent residual control for up to 60 days in proper conditions. Hexygon's unique mode of action provides effective ovicidal and immature stage control. Adult female mites exposed to sprays or foliar deposits of Hexygon will lay non-viable eggs – controlling mite population through life cycle interruption. Hexygon is ideal in an IPM program, compatible with most horticultural pesticides and adjuvants. Use on ornamental plants, as well as nonbearing trees and vines growing in nurseries and greenhouses. Hexygon is also ideal for established ornamental landscape plantings. The granular formulation is easy to measure, mix, and handle with low use rates and minimal PPE required.
