
GRIFFOLYN COVERS OFFER **EXTRA STRENGTH**
FOR **EXTREME** WEATHER CONDITIONS

Griffolyn TX-1200 is a 3 ply laminate combining two layers of linear low density poly and a high strength cord grid. Specifically engineered to provide strength and durability in a lightweight UV stabilized material. Excellent for use where extreme wind and weather prevail to cover greenhouses, soils & mulch, or as side curtains for livestock. Call for price quote

Available for immediate shipment in standard roll sizes 4' – 40' wide x 100' long (longer lengths sold in 4' increments) or custom fabricated to your configurations.

Clear = 80% light transmission, **White** = 20% light transmission, **Black or Black/ White** = 0 % light transmission

Griff-Clips are an innovative way to create a tie down fixture when and where one is needed. The unique design is non-penetrating and can easily be installed and moved for reuse without any tools. Works with all types of plastic films and reinforced fabrics and sheeting.
