

# PROFESSIONAL GROWING MIXES

## Standard and Custom Formulations

All Pro-Line blends are pH adjusted, include a starter charge and a micro-nutrients package. Our mixes are ready for your nutrition program or can be custom blended with controlled release fertilizers.

**PRO-LINE**

### PRO-LINE C/20

Our light weight mix of Canadian sphagnum peat and perlite is great general purpose mix recommended for a wide variety of potted plants and hanging baskets.

**C/20** is an appropriate soil mix for: Flowering and foliage plants, hanging baskets, seeds and cuttings.

Average density 10-12 lbs/cubic foot

### PRO-LINE C/B

A mix of Canadian sphagnum peat, processed pine bark fines, coarse perlite and medium vermiculite, C/B is geared toward growing flowering plants. The medium texture of the mix holds moisture well. A true, all-purpose mix.

**C/B** is an appropriate soil mix for: Flowering and foliage plants, hanging baskets and bedding plants.

Average density 14-16 lbs/cubic foot

### PRO-LINE C/25

This mix of processed pine bark fines, Canadian sphagnum peat, coarse perlite and medium vermiculite is geared toward growing perennials. C/25 is a coarse texture mix that allows for good air space and helps promote proper drainage.

**C/25** is an appropriate mix for: Flowering and foliage plants, hanging basket, roses and garden mums, nursery containers and interior planters.

Average density 16-20 lbs/cubic foot
