

T.O. PLASTICS

T.O. Plastics is a market leader in the horticultural industry, thermoforming a diverse range of high quality products, including wholesale plastic plant pots, plant trays, carry trays, liner trays, square pots, flats, inserts, plug trays, and propagation trays. We are committed to providing you with the highest quality, most competitively priced wholesale plastic plant pots and trays possible. We strive for on-time deliveries and will do everything possible to exceed your expectations.

We have worked with some of the most prominent growers in the country, and have helped them to develop some of the most innovative products on the market today. Contact a member of our knowledgeable sales staff to get started on your own custom product that's tailored specifically to your growing operation. Here are just a few of our custom capabilities:

- In-house product engineering and design
- In-house tooling
- High speed in-line thermoforming, gauges up to .070"
- Draw depths up to 10"
- Solid color or co-extruded two-color options available on most products
- We extrude and form Styrene, ABS and Polypropylene
- See our Capabilities Brochure for other materials we form
- In-line and off-line custom packaging and label application
